Cocurricular Learning in Middle Creek Park

I feel incredibly fortunate to have taken part in a fully outdoor and place-based course at OISE. The fact that our learning was aligned with the tenets of outdoor and place-based education created a unique experience of living and breathing the pedagogy we were learning about. This means that my learnings were cognitive and embodied and affective. I felt the possibilities, as a student, that stepping outside of a physical classroom could bring

ACTION RESEARCH
TEAM

As a faculty of education, OISE has been at the forefront of researching aspects of education related to Sustainability & Climate Action, as framed by the [United Nations Sustainable Development Goals \(SDGs\)](#). The fourth SDG, Quality Education, has been at the heart of research conducted by OISE researchers over decades, with impressive contributions to knowledge and understanding on SDGs such as Gender Equality, Good Health & Wellbeing, Reduced Inequalities, and Peace, Justice & Strong Institutions. Research into the SDG on Climate Action has been manifested at OISE through scholarship focusing on the many theories and practices of Environmental & Sustainability Education. Inspired by OISE faculty who mobilize evidence-based praxis in these areas, OISE graduate students are learning to conduct and share their own research as the next generation of scholars to contribute to a more equitable and sustainable future for all.

Climate Action Plan

OISE has a strong foundation from which to develop Community Engagement & Outreach in relation to Sustainability & Climate Action. SCAN helps to raise awareness and encourage action through its projects that include [OISE Community Learning Gardens](#) and over a dozen environmental art installations. [Natural Curiosity](#) project, affiliated with the Jackman Institute for Child Studies, provides professional learning for teachers focused on

Professional Learning Event with TDSB teachers

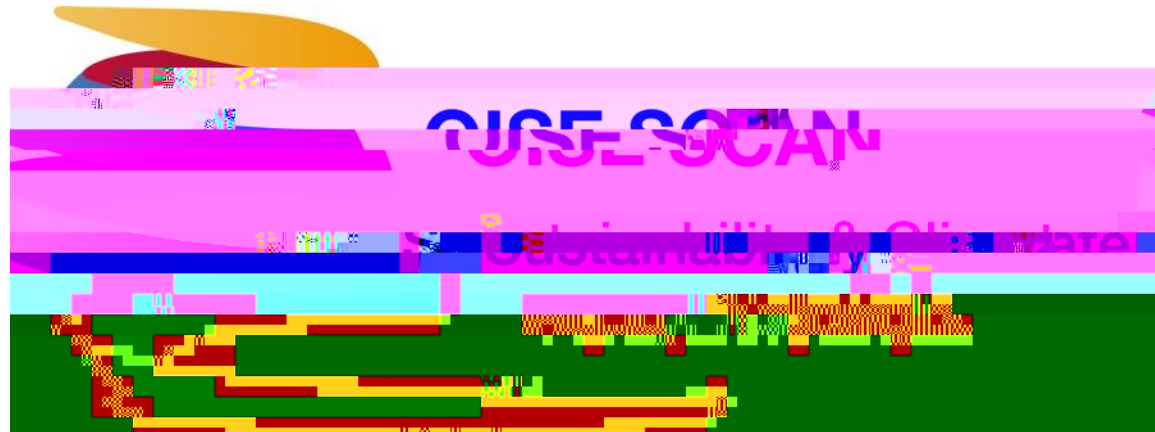

Seed-saving Workshop for the OISE Seed Library

A large group of people, mostly seen from behind, are seated in a lecture hall or auditorium. They are looking towards a stage area where a large screen displays a presentation. A person is visible on the stage, possibly a speaker or presenter. The room is dimly lit, with the primary light source being the screen and stage lights.

Our gratitude goes to all the members of the OISE community who contribute to the Sustainability & Climate Action Network, the work of the Natural Curiosity Program and the
